102

It has compact districts that balance all the neighborhoods; namely NW, East, South and Central. This was done based on the mathematics of population only and did not take into account where the current Councilmembers live.

103

Redistricting plan with core Hispanic area not divided.

104

Revision of 103 -- after further thought I decided that North H Street would make a logical boundary between the 3rd and 4th Districts so I shifted the 2nd 3rd and 4th districts around to make this work.

105

This is an evenly distributed map of the community with parks schools business and ethnic geographies equally represented.

106

This map recognizes the area between College and North Avenue as a focal point for the dense urban population while giving a fair representation to the demographics of Lompoc for each district.

107

This map considers communities of interest western border impacts eastern border impacts northern border impacts all while maintain contiguous districts.

108

A very compact map with a central district 2, northern district 1, and the south divided between district 3 in the southwest and district 4 in the southeast/east.

109

A very compact map with a western district 3, eastern district 4, northern district 2 and central district 2. District 2 unites the Highway 1 corridor from the High School and shopping center down to East Ocean Ave and J.M. Park at Chestnut and A Street.

**110 *NDC note: plan is not population balanced***

The map provides two districts which have a majority of Hispanic voter age residents. The map also reflects communities of interest as they relate to well established neighborhoods. The maps contain districts that are easily defined.

111

It keeps the districts diverse in makeup.
